2 GO terms clustered by 'binary_cut'
metabolic
derivative dnadependent carbohydrate glycoprotein replication
glycosylation nlinked purinecontaining
ribonucleoside triphosphate biosynthetic ribonucleotide acid nucleotide
process metabolic purine nucleoside
chromatid transition separation
chromosome metaphaseanaphase sister
mitotic segregation spindle cycle
energy atp synthesis
electron chain aerobic coupled transport respiration
division cell
myeloid immunity degranulation mediated response involved
activation leukocyte neutrophil immune
metabolic process
erad lipid cellular
proteasomal proteolysis process modificationdependent
catabolic ubiquitindependent
folding
detoxification cellular
metabolic process
metabolic process
reticulum endoplasmic transport
lamellipodium
